

# Career Packages

CareerPro360 customized packages provide the basic tools for a successful job search. Clients that have a plan of action and are armed with the necessary tools to carry out their job search initiatives, usually are more successful in accomplishing their goals. The tools selected in the following career package have been tested over and over again and clients report back that they use them not only in the initial approach to a prospective employer but many times during interviews to support their position.

After creating the documents selected to go in the client's job search kit, CareerPro360 then professionally packages the documents to provide the ultimate first impression and effectively differentiate the candidate from most other job applicants and as a serious job seeker. Following is an example of a standard career package.
